

Friction Fit Handrail Installation

Frameless Glass Balustrade System

Protector^{AI}
More than just fencing.

Never tap or bang on the edge of the glass or attempt to cut or drill as this could lead to breakage

ProtectorAI™ Friction Fit Handrails and accessories below are available in polished steel and satin black aluminium. The two finishes are not interchangeable and designs may differ slightly between the two finishes.

90° Joiner

Wall Bracket

Straight Joiner

End Cap

1. Measure and cut your handrail and rubber to the required length
2. Fit the rubber to the top of the glass
3. Push handrail down onto glass. Start at one end and slowly move your way along to ensure a firm fit
4. If necessary, warm soapy water can aid in pushing the channel firmly into place
5. Joiners and End Caps are available and sold separately, to install simply push into the open end of both pieces of handrail.

WARRANTY

Our goods come with guarantees that cannot be excluded under the Australian & New Zealand Consumer Laws. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. In addition to these guarantees and for your peace of mind, we also offer a 10 year warranty on our product. This warranty is subject to our terms and conditions. You can access the full terms and conditions of this warranty here: www.protectoral.com/warranty/glass/ You should read these terms and conditions in full prior to purchase of this product. By purchasing this product you accept our terms and conditions of the warranty.

MAINTENANCE

Like all surfaces, stainless steel and aluminium requires cleaning to remove dirt and grime to keep it in pristine condition. The level of cleaning and maintenance required depends primarily on the environment, e.g. coastal situations, the surfaces will require regular washing to retain their good looks and prevent tea staining.

Environment	Posts/Spigots
Seafront	Monthly
Coastal (within 5km of the coast)	6-12 months
Urban	6-12 months
Suburban Rural	As required to maintain appearance

NOTE: Harsh abrasives should never be used on any polished metal surface. For further information regarding care and maintenance refer to our website.
